Work Experience

Mappslab – Children's Media Workshop Salt Lake City, UT
Lead Developer Jul 2021 – Jan 2025

- Led the development of Mappslab, an interactive mapping tool for schools that leverages React, React Query, NextJS, and PostgreSQL.
- Integrated PostgreSQL as the database backend, designing efficient data schemas and optimizing database queries to ensure data integrity and high performance.

Place Draper, UT
Software Engineer Jul 2023 – Jan 2024

- Within a month of hire, cleared a 3-month backlog of issues escalated by QA through quickly identifying fixes, eliminating a bottleneck that had delayed resolution of incoming issues.
- Lead the effort in improving SEO scores across thousands of client websites by auditing site performance, optimizing image delivery, and identifying and remediating slow-loading page elements.
- Led frontend development of a new analytics tool using Next.js, building data visualizations and reporting views that let clients monitor website traffic and other metrics.

Atomic Jolt Remote
Software Engineer Jul 2020 – Aug 2021

- Worked closely with a team of engineers to create and deploy learning tools across 13 schools and organizations.
- Worked closely with clients, maintaining their websites and tools, resolving email spam concerns, ensuring basic website security, creating functional tools, and providing reliable feedback and support.

Projects

Jetty Games Salt Lake City, UT
Engineering Producer Sep 2026 – Present

- Co-founded a game development team of 10 members to build games and sharpen professional skills.
- Applied production management experience from professional background to set milestones, run team meetings, and keep projects on schedule

Snowfall Games Remote
Game Engineer Sep 2020 – Aug 2025

- Built the game's character control system from the ground up, designing a modular architecture that handled animations across multiple in-game items.
- Co-developed core game systems, including a targeting system integrated with the game's networking code.

Education

University of Utah Salt Lake City, UT
Computer Science Expected Spring 2028

Proficient Languages and Skills

TypeScript, JavaScript, React, C#, C++, C, Python, Java, PHP, Rust, Lua, SQL, Ruby on Rails, Unity, Unreal Engine
